## SECTION 4. FIRST AID MEASURES

### 4.1. Description of first aid measures

**Inhalation**– In case of inhalation poisoning symptoms (cough, dyspnea, dizziness) move to fresh air. Lay patient down in semi-recumbent posture, physical activity may cause pulmonary edema. Keep warm and rested. Get medical attention.

**Skin contact**– If product comes in contact with the skin immediately remove all contaminated clothing and flush exposed area with large amounts of water. Obtain medical attention if skin reaction occurs.

**Eye contact**- Immediately flush eyes with running water at least 15 minutes keeping eyelids open. Get medical attention

**Ingestion**- Wash out the mouth with water. Give lots of water to drink (1-2l). DO NOT induce vomiting. If victim is fully conscious, give a charcoal tablets. Contact a doctor and show this MSDS or label. Never give anything by mouth to an unconscious person.

### 4.2. Most important symptoms and effects, both acute and delayed

**Inhalation**– Severe irritant. may cause severe burns and serious damage of the upper respiratory tract. Irritation may lead to chemical pneumonitis and pulmonary edema. Symptoms may include: coughing, sore throat, breathing difficulty, rhinorrhoea (runny nose), pharyngolaryngeal pain.

**Skin** – Corrosive, may cause severe burns, may cause deep, penetrating ulcers of the skin. May cause skin cold and clammy skin with cyanosis or pale color.

**Eyes** - Corrosive, may cause severe eye burns. May cause chemical conjunctivitis and corneal damage (redness, intense pain), possible irreversible impairment of vision or blindness.

**Ingestion** –is swallowed, may cause irritation of the mouth, throat and esophagus.

### 4.3. Indication of any immediate medical attention and special treatment needed

Obtain medical attention. Self-contained eye wash or shower should be readily available.

## SECTION 5. FIREFIGHTING MEASURES

### 5.1. Extinguishing media

**Suitable extinguishing media:** use extinguishing measures that are appropriate to local circumstances and surrounding environment.

**Extinguishing media which shall not be used for safety reason:** DO NOT use a solid water stream.

### 5.2. Special hazards arising from the substance or mixture

Product is non-flammable.

### 5.3. Advice for firefighters

Firefighters should wear full protective clothing and self-contained breathing apparatus. In case of fire warn the people nearby. Evacuate unprotected and untrained personnel from hazard area. If possible, remove the containers away from the influence of fire and high temperature. Water may be used to keep fire-exposed containers cool until fire is out. The after burning residues should be removed.

## SECTION 6. ACCIDENTAL RELEASE MEASURES

### 6.1. Personal precautions, protective equipment and emergency procedures

**For non-emergency personnel:** protective gloves, safety glasses

**For emergency responders:** self-contained breathing apparatus, protective clothes, protective gloves, safety glasses

Avoid skin and eyes contact. Provide proper ventilation.

### 6.2. Environmental precautions

Avoid discharge into drains, water courses or onto the ground. Prevent from entering into soil.

### 6.3. Methods and material for containment and cleaning up

Prevent spills from entering sewers, surface water or groundwater. If it is possible confine and contain the spill by closing liquid flow, damage container put into protect leak proof wrapping. For large spill make a dike around the outside edges of the spill. Clean-up materials store for disposal as hazardous waste. Decontaminate polluted area with water. For small spill use absorbent materials (sand solid, sawdust, fines limestone) and store for disposal as hazardous waste. Decontaminate polluted area with water

### 6.4. Reference to other sections
